# The long Fighter

# CANDEVA-N

Clotrimazole 1.0% + Beclomethasone Dipropionate 0.025%

**ECZEMA**

**PSORIASIS**

**ATOPIC DERMATITIS**

**SEBORRHOEA**

Clotrimazole is used to treat skin infections such as athlete's foot, jock itch, ringworm, and other fungal skin infections (candidiasis). This medication is also used to treat a skin condition known as pityriasis (tinea versicolor), a fungal infection that causes a lightening or darkening of the skin of the neck, chest, arms, or legs. Clotrimazole is anazole antifungal that works by preventing the growth of fungus.

Beclomethasone is classified as a more potent topical corticosteroid than hydrocortisone, Dexamethasone & Betamethasone in the management of irritant & Allergic Dermatitis

Beclomethasone Dipropionate is a new topical steroid with marked Vasoconstrictor and Anti-Inflammatory Activity

## Benefits for All Angels

**Potent Steroid for Inflammatory  
Pruritic Conditions**

# CANDEMIC-MN

Clobetasol Propionate 0.05% W/w, Miconazole Nitrate 2% W/w  
+ Neomycin Sulphate 0.5% W/w + Chlorocresol 0.10% W/w Cream

**Exhibits Anti-Inflammatory action.**

**Inhibits Phospholipase A2 Inhibitory proteins, collectively called lipocortins.  
These protein control the biosynthesis of potent mediators of Inflammation.**

## **Indications**

- \* Topical treatment of the inflammation and pruritic manifestations of Moderate to severe
- \* corticosteroid-responsive dermatoses.
- \* Mild to moderate plaque-type psoriasis

*Negates Inflammatory Conditions*

# FUMOM-F

Mometasone Furoate 0.1%w/w+ Fucidic Acid 10gm Cream

## Fucidic Acid

Possesses anti-bacterial, antimicrobial Properties  
Highly active against both MSSA & MRSA Isolates of Staphylococcus  
The incidence of adverse events and allergic reactions to fusidic acid is low.

## FUMOM-HT

Hydroquinone 2.00%w/w, Tretinoin 0.05%w/w, Mometasone Furoate 0.1%w/w 10gm Cream

## Hydroquinone

Hydroquinone is used to lighten the dark patches of skin (also called hyperpigmentation, melasma, "liver spots," "age spots," freckles) caused by pregnancy, birth control pills, hormone medicine, or injury to the skin.

## Tretinoin

This medication is used to treat acne. It may decrease the number and severity of acne pimples and promote quick healing of pimples that do develop. Tretinoin belongs to a class of medications called retinoids. It works by affecting the growth of skin cells.

## Mometasone Furoate

This medication is used to treat skin conditions such as eczema, psoriasis, allergies, and rash. Mometasone decreases swelling (inflammation), itching, and redness. Mometasone is a medium-strength corticosteroid. This medication is available in several forms including cream, ointment, and lotion (solution). Your doctor will choose the type of product based on the skin condition/area of the body being treated.
